### Our products - From the first bicycle box to the Bicycle Parking Garage

#### SmartRemote

Basic control for everyone who wants to open their bike box conveniently from a smartphone or other mobile devices. For practices, shops, offices and private use.

#### SmartCampus<sup>1</sup>

With management portal. The operator flexibly controls who has access, when, and for how long. Electronic parking tickets are transmitted in real time. For businesses, hotels, municipalities and all users with changing visitors. Optional reservation and payment in the integrated booking portal.

#### SmartCity<sup>2</sup>

Individually tailored access control with management portal for complex usage options such as bicycle parking garages, mobility chains. Can be integrated into third-party portals and apps via interface. For car parks, municipalities, company and hospital premises.

>>> Reservation and Operation conveniently via Smart Phone <<<

>>> Multiple use in different Time-Frames <<<

>>> Integrated payment option <<<

1 SmartCampus includes all functions of SmartRemote / 2 SmartCity includes all functions of SmartCampus / Access control requires the use of Book-n-Park bicycle boxes, available for purchase, retrofit and lease.

# Book-n-Park

## Innovative Technology

The bike boxes are set up at your location by our partners or your bike boxes are converted with the Book-n-Park control system. The bike boxes are connected to the internet via LAN, WLAN or LTE. The bike boxes can be conveniently managed via the web portal [www.book-n-park.de](http://www.book-n-park.de). Operators can control the use on the computer, release users and always have full transparency over all reservations. The management portal optionally allows convenient online reservation and billing. Payment is made via PayPal, among other methods. The operator defines the price models. Free use, basic prices for reservations and time tariffs are possible.

## Mission Scenario: SmartCampus for Municipalities and Companies

The bicycles are secured by the bicycle box 4.0. Guests, employees and customers can reserve and open bicycle boxes via smartphone. Unused bicycle boxes are flexibly available to employees and visitors.

## How it Works:

1. Customers book their bike box in the web portal or the operator choose a parking space for his guests.
2. The E-parking ticket Comes on your smartphone in real time with a link.
3. This activates the remote control on the bike box.
4. Tap "Open" and the bicycle box opens.

## About Us

Green Mobility Solutions develops, manufactures and operates innovative smart mobility solutions. The company works on sharing solutions that make it possible to shape a more sustainable future and conserve resources. The Book-n-Park application for reserving and operating internet-controlled bicycle boxes, but also parking barriers (e.g. parking bars, parking barriers), already enables the efficient access control of the future. Book-n-Park is reliably in use throughout Germany in hotels, municipalities, multi-storey car parks and universities.
